

# Міжнародні наукометричні бази даних **Scopus та Web of Science:** особливості пошуку релевантної інформації

Ольга Володимирівна Куц  
завідувачка сектору  
інформаційно-аналітичної роботи

2023

# Наукометричні бази даних

Бібліографічні та реферативні бази даних, інструмент для відстеження цитованості наукових публікацій

Пошукова система, яка формує статистичні дані, які характеризують стан і динаміку показників затребуваності, активності та індексів впливу діяльності окремих наукових діячів і різних науково-дослідних організацій.

**ELSEVIER**

<https://www.webofscience.com/>

Платформа, що складається з декількох баз даних для пошуку літератури і призначена для підтримки наукових досліджень

### Web of Science Platform

- > 34 тис. проіндексованих журналів
- > 171 млн записів
- > 48 млн патентних родин (> 97 млн патентів)
- > 1,89 млрд процитованих джерел (від 1900 р.)

### Web of Science Core Collection

- Головний ресурс на платформі
- > 21 тис. рецензованих високоякісних наукових журналів
  - > 85,9 млн записів
  - > понад 300 тис. матеріалів конференції
  - > понад 134 тис. відібраних редакцією книг
  - > 1,9 млрд процитованих джерел (від 1900 р.)
  - > 17,2 млн записів відкритого доступу з посиланнями на повний текст

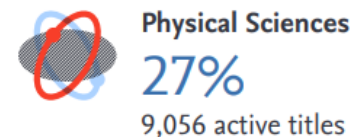

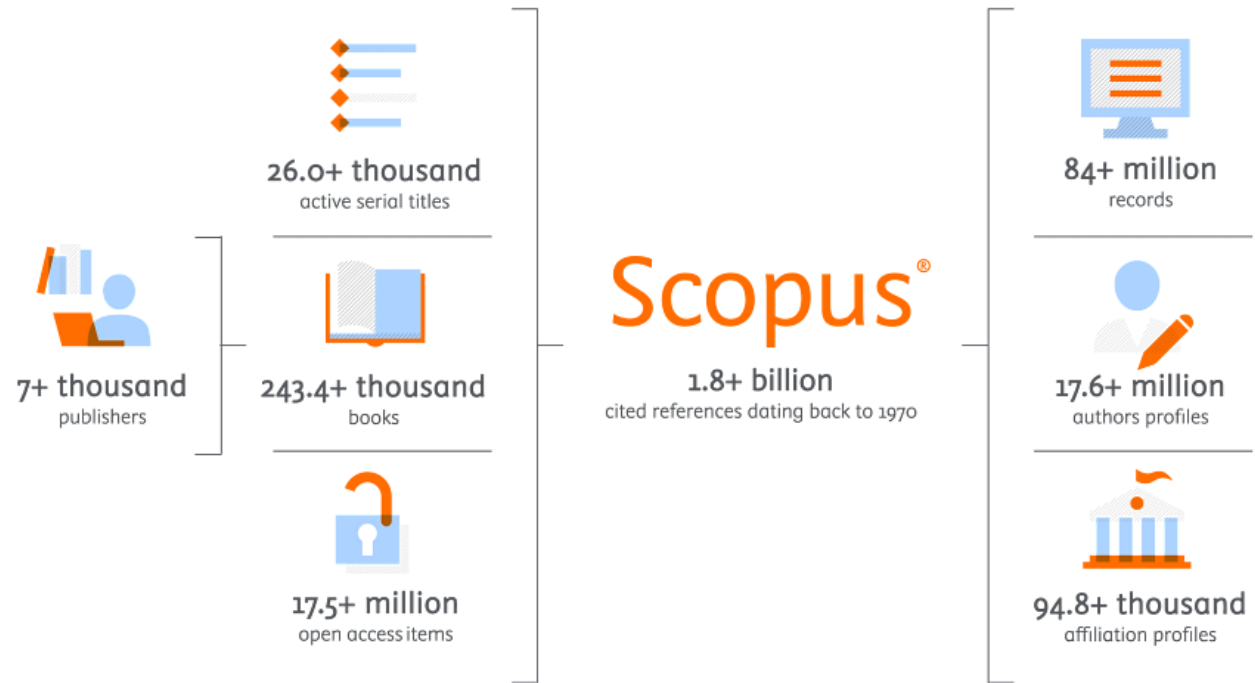

# Scopus®

<https://www.scopus.com/>

Одна з найбільших у світі наукометрична реферативна база даних видавництва Elsevier

Потужний пошуковий та аналітичний інструмент для дослідників, бібліотекарів, керівників досліджень та фінансуючих організацій

# Реєстрація та віддалений доступ

<https://www.webofscience.com/>

## Варіант Б

1. Реєстрація поза межами університету (з іншого міста/країни)
2. Звернутися до технічної підтримки, надати інформацію про українську установу, в якій працюєте та попросити налаштувати віддалений доступ. Написати листа можна на адресу [wosg.support@clarivate.com](mailto:wosg.support@clarivate.com) або створити запит за посиланням [https://support.clarivate.com/ScientificandAcademicResearch/s/?language=en\\_US](https://support.clarivate.com/ScientificandAcademicResearch/s/?language=en_US)

## Варіант А

1. Реєстрація в межах університету (з IP-адреси)
2. Автоматичне отримання дистанційного доступу на пів року

The screenshot shows the Clarivate support page. At the top, there is a navigation bar with the Clarivate logo and links for 'Who we serve', 'Products & Services', 'Resources', and 'Contact us'. Below this is a search bar labeled 'Search our Knowledge Base'. The main content area is titled 'Support' and includes a 'Select Your Product' dropdown, 'Account Services', and 'Call Us' links. The primary heading is 'Web of Science and related products', with a language selector set to 'English (US)'. On the left, there are sections for 'Featured articles' and 'Trending articles'. The 'Featured articles' section lists: 'Web of Science: Accessing from home', 'InCites, JCR, ESI: Accessing from home', 'Proxy settings for Web of Science and InCites', and 'Web of Science Journal Submission'. The 'Trending articles' section lists 'Web of Science: h-index information'. On the right side, there is a vertical menu with icons and text: 'Chat with an expert', 'Submit an inquiry' (with a red box around 'Product or technical question'), 'Email our support team', and 'Learning & Training'.

# Реєстрація та віддалений доступ

Scopus®

<https://www.scopus.com/>

## Варіант А

1. Реєстрація в межах університету (з IP-адреси)
2. Написати листа на пошту [ov.kuts@knmu.edu.ua](mailto:ov.kuts@knmu.edu.ua) (Куц Ольга) та вказати пошту, з якої Ви зареєструвалися у Scopus

## Варіант Б

1. Реєстрація на сайті Scopus поза межами університету (з іншого міста/країни)
2. Написати листа на пошту [ov.kuts@knmu.edu.ua](mailto:ov.kuts@knmu.edu.ua) (Куц Ольга) та вказати пошту, з якої Ви зареєструвалися у Scopus
3. Отримайте лист з інструкцією та активуйте доступ

## Варіант В

1. Написати листа на пошту [ov.kuts@knmu.edu.ua](mailto:ov.kuts@knmu.edu.ua) (Куц Ольга) та вказати пошту, з якої Ви бажаєте зареєструватися у Scopus
2. Отримайте лист з інструкцією та активуйте доступ

## Abstract

**IMPORTANCE** Colorectal cancer (CRC) is the third most common cause of cancer mortality worldwide with more than 1.85 million cases and 850 000 deaths annually. Of new colorectal cancer diagnoses, 20% of patients have metastatic disease at presentation and another 25% who present with localized disease will later develop metastases. **OBSERVATIONS** Colorectal cancer is the third most common cause of cancer mortality for men and women in the United States, with 53 200 deaths projected in 2020. Among people diagnosed with metastatic colorectal cancer, approximately 70% to 75% of patients survive beyond 1 year, 30% to 35% beyond 3 years, and fewer than 20% beyond 5 years from diagnosis. The primary treatment for unresectable metastatic CRC is systemic therapy (cytotoxic chemotherapy, biologic therapy such as antibodies to cellular growth factors, immunotherapy, and their combinations.) Clinical trials completed in the past 5

### JOURNAL OF HEPATOLOGY

Volume: 76 Issue: 3 Page: 681-693

DOI: 10.1016/j.jhep.2021.11.018

Published: MAR 2022

Indexed: 2022-03-17

Document Type: Review

### Abstract

There have been major advances in the armamentarium for hepatocellular carcinoma (HCC) since the last official update of the Barcelona Clinic Liver Cancer prognosis and treatment strategy published in 2018. Whilst there have been advances in all areas, we will focus on those that have led to a change in strategy and we will discuss why, despite being encouraging, data for select interventions are still too immature for them to be incorporated into an evidence-based model for clinicians and researchers. Finally, we describe the critical insight and expert knowledge that are required to make clinical decisions for individual patients, considering all of the parameters that must be considered to deliver personalised clinical management. # Меню облікового запису

The screenshot shows the 'Marked List' page. The left sidebar contains navigation options: 'My Web of Science', 'Marked List' (with a count of 90), 'View your search history', 'Profile', and 'Saved Searches and Alerts'. The main content area is titled 'Marked List' and has two tabs: 'My marked lists (7)' and 'Unfiled Records (90)'. Below the tabs, there is a section for '90 Unfiled Records' with a sub-header 'These items have not been added to a list yet. Start organizing your unfiled records by clicking each item.' A table below lists the types of unfiled records:

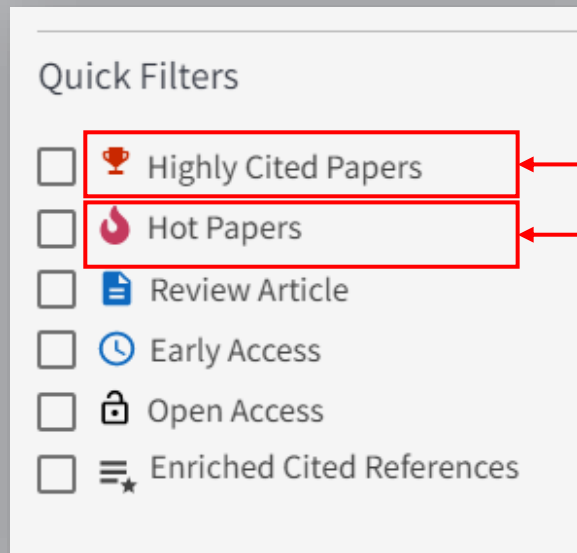

Type	Count
Documents	90
Chem Structures: Reactions	0
Chem Structures: Compounds	0

The screenshot shows the 'Search alerts' page. The left sidebar is identical to the previous screenshot. The main content area is titled 'Search alerts' and includes a description: 'Search Alerts will email you when new publications are added to the database that match your saved search or your saved search is on Nanotechnology, our system emails new works on this topic at a frequency of your choice'. Below this, there is a dropdown menu for 'Alert name - ascending'. A search alert card is displayed with the following details:

- Name: abnormal uterine t
- Topic: ((dysfunctional or abnormal or atypical) and (uterine or vaginal) and bleeding) and (obesity) (Topic)
- Database: Web of Science Core Collection
- Status: Inactive
- Action: Rerun Search
