## CEBM CENTRE FOR EVIDENCE BASED MEDICINE

UNIVERSITY OF OXFORD

Welcome to CEbm  
Welcome to the Centre for Evidence-based Medicine at the University of Oxford.  
CEBM aims to develop, teach and promote evidence-based health care through conferences, workshops and EDM tools so that all health care professionals can maintain the highest standards of medicine.

The countdown has begun...  
JULY

Current Courses & Workshops  
We offer a range of courses to clinicians and other healthcare professionals seeking to develop their EDM skills.

## The Section on Evidence Based Health Care OF THE NEW YORK ACADEMY OF MEDICINE

Welcome About Publications Teaching & Learning Other Resources

Teaching Evidence Assimilation for Collaborative Healthcare  
Sponsored by the Section on Evidence Based Health Care, The New York Academy of Medicine  
Date: Aug 7-9, 2013  
Place: The New York Academy of Medicine, 1216 Fifth Avenue (at 103rd Street), NYC 10029

Speakers: Internationally recognized speakers and faculty include:

- Rita Charon MD, PhD, Columbia University
- Yngve Falck-Ytter, MD, Case Western Reserve University
- Ian Graham PhD, Canadian Institutes for Health Research
- Patricia Stone, RN, PhD, Columbia University

Register Here  
The TEACH program is for physicians, nurses, pharmacists, administrators, librarians and other health care professionals. It utilizes small group learning supplemented by plenary sessions. Attendees may enroll in one of three levels. One group within Level #2 will focus exclusively on the GRADE system.

<b>Level #1: Foundations of EBC</b> Participants of varying levels of prior training acquire and deepen basic	<b>Level #2: Policies and Recommendations for EBC</b> Participants learn how EBC skills are applied to the development of	<b>Level #3: Implementing EBC</b> Participants learn to combine EBC skills with principles of organizational change and

## CENTRE FOR HEALTH EVIDENCE

About Contact Publications EBM Tools Contact Us Site Map

About the Centre for Health Evidence  
The Centre for Health Evidence (CHE) is a not-for-profit organization based at the University of Alberta. We are dedicated to helping health organizations and associations find and apply best evidence in daily practice. We work in a broad base, and use a variety of communication and information technologies to create decision support tools and policies.

CHE Mission  
The Centre for Health Evidence was established to help patients, practitioners, and policy makers:

Know what to do  
because quality knowledge resources are assembled, integrated and packaged using simple, user-specific, Internet desktops

Do what is known  
because online aids help users assess problems, ask questions, and acquire, appraise, and apply knowledge

Understand what is done  
because information use is monitored and managed

CHE Vision  
The Centre for Health Evidence (CHE) will lead the way for health service providers toward unparalleled excellence in decision support, learning enhancement, practice-based evidence, and innovative research.

### centre for Evidence-Based Medicine TORONTO

Welcome to the CEbm  
The goal of this website is to help develop, disseminate, and evaluate resources that can be used to practice and teach EBM for undergraduates, postgraduate and continuing education for health care professionals from a variety of clinical disciplines. This site also serves as a support for the book entitled, Evidence-based Medicine: How to Practice and Teach EBM by Sharon E. Straus, W. Scott Richardson, Paul Glasziou, and R. Brian Haynes.

**Best Evidence Topics (BETs) Introduction**

Why EBM? Medical practice has always been informed by many things: textbooks, personal experience (good and bad), scientific research, patient expectations, teaching from senior doctors, colleagues' opinions, and what's latest. The list goes on. Every clinical decision is based on a combination of these factors, adding to differing degrees upon the individual clinician.

Leadership • Guidance • Support

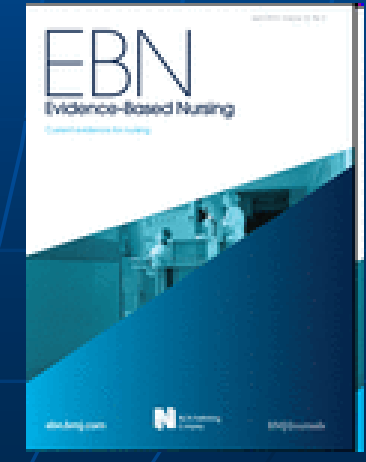

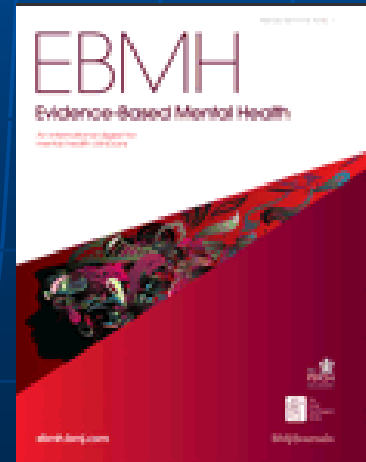

### Building evidence into practice

Time is the greatest challenge to delivering evidence-based health care. Keeping up with emerging guidelines and research can be overwhelming.

The BMJ Evidence Centre supports healthcare practitioners and institutions by providing trustworthy information, in formats that recognise the demands and limitations of everyday clinical life.

Document Detail

SchARR-Lock's Guide to the Evidence

Abstract/OtherAbstract: A guide to printed sources of evidence for medicine. It aims to complement the IDEA list produced by M the Oregon Health Sciences University, and to identify those materials less likely to appear in the Cochrane Medline. The list of documents included in the database is arranged alphabetically by MeSH headings. All the list show evidence of a literature search to identify high quality evidence on the topic, or include a co single article.

Last Update: 19 Apr 2013

Enter search terms into the text box.

- Search terms can include disease, exposure, gene, author, journal, etc.
- Simple Boolean operators are allowed, such as AND or OR.
- Use the Search dropdown list to switch to other HuGE Navigator applications.

HuGE Literature Finder is a search engine for finding published literature on genetic associations and other human genome epidemiology. The search query can include disease/outcome, environmental factors, genes, author's name, affiliation, etc. The results can be further refined by the filtering feature. The list of selected articles can be redirected to the PubMed website to take advantage of the functionality it provides, such as updating to reference software.

Note: Database includes publications since 2001.

### Embbase: Biomedical Database

The most comprehensive international database for biomedical answers

Embbase from Elsevier Life Science Solutions is the most comprehensive international biomedical database for biomedical researchers. It enables you to track and retrieve precise information on drugs and diseases from pre-clinical studies to searches on critical toxicological information.

Embbase's biomedical database has over 25 million indexed records from thousands of peer-reviewed journals. Embase provides the confidence and tools you need to capture the most relevant and up-to-date biomedical research.

Information managers, regulatory specialists, clinicians, medical librarians, educators and students use Embase for its breadth and depth of data. Embase can help you with everything from clinical trials research to pharmacovigilance.

Правила составления запроса при поиске ?  
Выбрав необходимую область поиска (ключевые слова, автор, заглавие, год издания), введите запрос в поле ввода.  
При поиске по **ключевым словам** - фразу на естественном языке. Ключевые слова формируются практически из всех полей библиографического описания. Фраза разбивается на отдельные слова (прифраз не учитывать), которые морфологически нормализуются (только для русских слов). При поиске по **ключевым словам** применяется алгоритм ранжирования найденных документов: список результатов поиска сортируется в порядке убывания ранга документа. Чем больше в найденном документе слов из запроса, чем эти слова ближе друг к другу и чем больше их суммарный вес - тем выше место документа в результате поиска.  
Ссылка "Найти похожие", которая показывается в библиографическом описании найденных записей, формирует запрос на ранжированный поиск, включающий все ключевые слова из записи.
