Ph.D., Associate Professor, Department of Histology,

Cytology and Embryology,

Kharkiv National Medical University

Kharkiv, Ukraine;

Postgraduate Student, Department of Human Anatomy,

Kharkiv National Medical University

Kharkiv, Ukraine;

Education is a significant factor in the countries development. It forms an intellectual and cultural heritage, hence the quality of education is a topical issue which needs to be dealt with. The progress and modernization of society, the development of new information technologies lead to the emergence of new trends in the educational field.

The internationalization of Higher education in Ukraine is one of the priorities of the State policy. In order to accelerate the process of internationalization of Ukrainian education, it is foremost necessary to create a modern, high-quality education system and expand the range of educational services that are provided. Secondly, to update the legislative and regulatory framework for the studying of foreign students, which should attract those, who want to study in Ukraine. Last but not least, orient the university to train specialists for particular countries and for specific specialties, since, according to forecasts of professionals, the segmentation of the market for foreign applicants will occur soon.

However, despite legislative developments, the financial resources allocated to integration are scarce in the field of education. Attraction of foreign investment to Ukraine may be a source of dynamic development of the education system.

Finally, it is worth noting the importance of the process of internationalization of Ukrainian education, because it will allow Ukrainian universities to improve the image of Higher education in Ukraine abroad, to use the world experience for the reorganization and improvement of the education system in Ukraine.
